## **DETAILED ACTION**

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: With respect to claim 21, the Prior Art does not teach detecting a first servo signal; detecting a servo second signal; calculating a time period between the detection of the first servo signal and the second servo signal; and adjusting a characteristic associated with at least one device if the calculated time period is not within a predetermined range.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 22-30 are objected to as being dependent upon an objected base claim.

### ***Conclusion***

This application is in condition for allowance except for the following formal matters:

Claims 31-40 are objected to under 37 CFR 1.75 as being a substantial duplicate of claims 21-30. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claim 21 is objected to because of the following informalities: Claim 1, line 9 reads, "a first servo control signal", making no distinction between it and the control

signal in line 8. It should read "a second servo control signal". Appropriate correction is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
